ClearCase® Advanced

WINDOWS = UCM CLEARCASE 8.0 = DYNAMIC VIEWS

ID: CC-ADV-WIN-DYN-UCM-8

Overview

Recommended follow-on to the *ClearCase Intermediate* course for project leaders and advanced ClearCase users who are responsible for creating and maintaining the ClearCase environment. This one-day, hands-on course covers project design, project creation, user access, and process control.

Prerequisites

 ClearCase Fundamentals and ClearCase Intermediate courses or equivalent ClearCase experience

Objectives

At the end of this course, students will be able to use ClearCase capabilities to design and deploy a ClearCase environment, including:

- Designing VOB directory structures
- Designing and creating ClearCase projects
- Importing an initial set of data
- Setting file permissions
- Using metadata to implement policy

Outline

Storage Locations Creating storage locations for VOBs/views

Create Project VOB Creating project VOBs
Create Data VOB Creating data VOBs

Component Import Importing components and CC labels into UCM project VOB

VOB Planning

Data Import

Data Conversion

VOB/component planning

Using the data import tool

Using the data conversion tools

Foundation Baselines Understanding and changing UCM foundation baselines

New Project Creation Creating a new project in UCM Shared Components Sharing components across PVOBs

Deliver Policies Setting UCM inter-project delivery policies

Multiple Baselines Understanding baselines for multi-component UCM projects

Composite Baseline Creating UCM composite baselines

Rebase Issues Investigating rebase situations that can introduce incorrect versions

Links Symbolic and hard links in VOBs
Element Permissions Setting element permissions
MVFS Basic Basic picture of MVFS architecture

Logs Overview of error logs

Triggers Creating and using triggers to automate policy
