

# ClearCase® Advanced

WINDOWS ■ UCM CLEARCASE 8.0 ■ WEB VIEWS

ID: CC-ADV-WIN-WEB-UCM-8

## Overview

Recommended follow-on to the *ClearCase Intermediate* course for project leaders and advanced ClearCase users who are responsible for creating and maintaining the ClearCase environment. This one-day, hands-on course covers project design, project creation, advanced concepts, and process control.

## Prerequisites

- *ClearCase Fundamentals* and *ClearCase Intermediate* courses or equivalent ClearCase experience

## Objectives

At the end of this course, students will be able to use ClearCase capabilities to design and deploy a ClearCase environment, including:

- Designing VOB directory structures
- Designing and creating ClearCase projects
- Importing an initial set of data
- Using metadata to implement policy

## Outline

Storage Locations	Creating storage locations for VOBs/views
Create Project VOB	Creating project VOBs
Create Data VOB	Creating data VOBs
Component Import	Importing components and ClearCase labels into UCM project VOB
VOB Planning	VOB/component planning
Data Import	Using the data import tool
Data Conversion	Using the data conversion tools
Foundation Baselines	Understanding and changing UCM foundation baselines
New Project Creation	Creating a new project in UCM
Deliver Policies	Setting UCM inter-project delivery policies
Composite Baseline	Simplifying baselines in projects with multiple components
Rebase Issues	Investigating rebase situations that can introduce incorrect versions
Links	Symbolic and hard links in VOBs
Element Permissions	Setting element permissions
Logs	Overview of error logs
Triggers	Creating and using triggers to automate policy
