

Exactly What You Need—When and Where You Need It

Deploying IBM® Rational® Jazz™ CLM tools, perhaps across the globe, is a big challenge. Developers, project managers, business analysts, scrum masters—each role needs to focus on different aspects of tool usage, and they don't want to spend time learning features they don't need.

We get it. Our unique training model was designed to allow clients to configure a curriculum that precisely fits their needs.

We've Enabled Thousands of IBM Rational Users Worldwide

Our client-centered training solutions include:

- Role-based training with a typical 80% lab and 20% lecture mix, so students leave class ready to use the tool for their *specific* tasks in their environment.
- Live, instructor-led training in local time zones—**anywhere@anytime** via our virtual infrastructure that supports onsite, remote, or hybrid class delivery.
- Great instructors—tool experts who love to teach.
- Support for all RTC client interfaces, including Eclipse™, .NET, Web, Shell, and RTC/RDz integrated interface for z/OS® developers.

Rational Team Concert™ 3.0.1 and 4.0.2 **Eclipse ▪ Web ▪ .NET ▪ z/OS ▪ Shell Variations**

Team Collaboration ▪ 1 day
Source Control ▪ 1 day
Project Manager ▪ 1 day
Build ▪ ½ day
RTC for Scrum Teams ▪ 1 day
Jump Start Deployment Program

Rational Requirements Composer 3.0.1 and 4.0.2

Fundamentals ▪ 1 day
