

Rational® Asset Manager Fundamentals

WEB INTERFACE

ID: RAM-PROD-WEB

Overview

This one-day, hands-on class covers the fundamentals of asset management using IBM Rational Asset Manager.

Audience

- Users who will access and product assets using the Web interface.

Prerequisites

- No previous Rational Asset Manager experience required.

Objectives

At the end of this course, students will be able to perform asset management activities required for daily usage, including finding, viewing, subscribing to, rating, importing, modifying, creating, and deleting assets and creating and using forums for assets.

Outline

RAM Overview	Overview of RAM
RAM Startup	Client startup and connection
Find Assets	Find assets using searches and queries; understand the Asset view
Filters and Tags	Search using filters and tags; create queries
Visual Browse	Generate diagrams of inter-asset links/relationships
Download Assets	Download assets for modification or reuse
