

Rational Team Concert™ Enterprise Builds

ECLIPSE™ INTERFACE ■ RTC ENTERPRISE VERSION 5.0.1

ID: RTC-BUILD-Z-501

Overview

This half-day, hands-on class covers submitting builds, viewing build results, promoting streams, and deploying build output.

Audience

- Developers who are responsible for creating load modules or responsible for promoting/deploying build results.

Prerequisites

- Island Training's *RTC Enterprise Source Control Basics* class or equivalent knowledge.

Objectives

At the end of this course, students will be able to use the RTC Enterprise build system to build, promote, and deploy load modules.

Available Build Modules

Build Overview	Overview of RTC enterprise build, promote, and deploy functions
Enterprise Extensions	Overview of build, promote, and deploy configuration/definitions
Subset Builds	Request workspace and stream builds for specific changes
Full Builds	Request full workspace and stream builds
Build Output	Browse build output returned by RTC build
Dependency Builds	Request a build based on dependencies
Promotion	Promote work item from Dev stream to Test stream
Build Map Gap Errors	Resolve build map errors during promote due to gaps
Package and Deploy	Create and deploy build output packages

Contact us to choose appropriate modules for your workgroup from our library of over 1000 modules.
