

# Rational Team Concert for Project Managers

WEB INTERFACE ■ RTC VERSION 4.0.2

ID: RTC-PRJ-WEB-4

## Overview

This one-day, hands-on class covers Rational Team Concert basic project setup, configuration, and role based permissions.

## Audience

For project managers, we recommend this as follow-on to the *Rational Team Concert Team Collaboration* and *Rational Team Concert Source Control* courses.

## Prerequisites

- Basic knowledge of the Eclipse IDE is helpful for modules that require the Eclipse interface.
- Island's *Rational Team Concert Team Collaboration* class or equivalent experience.

## Objectives

At the end of this course, students will be able to create and configure projects, teams, iterations, and work item categories. They also will learn to customize role based permissions for projects.

## Outline

Overview	Introduction to the Project Manager class
Create Project	Create projects; add project members; assign roles
Timelines and Iterations	Create project timelines and iterations
Create Teams	Create teams; add team members; assign roles
Categories	Create and associate work item categories
Create Plans	Create and configure plans
Best Practices	Best practices for creating timelines, teams, categories, and plans
Plan Reports	Plan notes, snapshots, and Burndown report
Plan Views	Create and configure plan views

### The following modules available only in Eclipse interface:

Plan Customizations	Customize estimate field and default work environment
Behavior	Overview and modification of behavior settings
Process Overrides	Override process and behavior for teams and iterations
Iteration Types	Create, configure, and use iteration types to modify behavior
Dashboard Templates	Create and configure dashboard templates

Contact us to choose appropriate modules for your workgroup from our library of over 800 modules.
