

Rational Team Concert™ for Project Managers

WEB INTERFACE ■ RTC VERSION 5.0.1

ID: RTC-PRJ-WEB-501

Overview

This one-day, hands-on class covers Rational Team Concert basic project setup and configuration, as well as process and behavior customizations.

Audience

For project managers, we recommend this as follow-on to the *RTC Team Collaboration* class.

Prerequisites

- Island Training's *RTC Team Collaboration* class or equivalent experience.

Objectives

At the end of this course, students will be able to create and configure projects, teams, iterations, and work item categories. They also will learn to customize process and behavior for projects.

Outline

Overview	Introduction to the Project Manager class
Create Project	Create project area; add project members; assign roles
Timelines and Iterations	Create project timelines and iterations
Roles and Permissions	Create member roles; set permissions for roles
Create Teams	Create teams; add team members; assign roles
Categories	Create and associate work item categories
Create Plans	Create and configure plans
Best Practices	Best practices for creating timelines, teams, categories, and plans
Plan Reports	Plan notes, snapshots, and Burndown report

The following advanced modules available only in Eclipse interface:

Plan Views	Promote custom plan views to all users
Plan Customizations	Customize estimate field and default work environment
Behavior	Overview and modification of behavior settings
Process Overrides	Override process and behavior for teams and iterations
Iteration Types	Create, configure, and use iteration types to modify behavior

Contact us to choose appropriate modules for your workgroup from our library of over 1000 modules.
